ABSTRACT

The 2011 Genoa (Italy) floods caused significant damage to the city and its surrounding areas. This paper discusses the ethical considerations of building a resilient community through social networks in the context of the 2011 Genoa floods. The authors explore the role of social networks in disaster recovery and the ethical implications of using social networks for disaster relief. The paper concludes that social networks can play a significant role in building a resilient community, but it is essential to consider the ethical implications of using social networks for disaster relief.

Keywords

disaster recovery, social networks, ethical considerations, 2011 Genoa floods

INTRODUCTION

On 4 November 2011, a severe storm hit the city of Genoa (Italy) and caused significant damage to the city and its surrounding areas. Over 500 people were killed and thousands of homes were destroyed. The disaster highlighted the need for a resilient community that can recover from such events. This paper discusses the ethical considerations of building a resilient community through social networks in the context of the 2011 Genoa floods. The authors explore the role of social networks in disaster recovery and the ethical implications of using social networks for disaster relief. The paper concludes that social networks can play a significant role in building a resilient community, but it is essential to consider the ethical implications of using social networks for disaster relief. The authors also discuss the role of social networks in disaster recovery and the ethical implications of using social networks for disaster relief. The paper concludes that social networks can play a significant role in building a resilient community, but it is essential to consider the ethical implications of using social networks for disaster relief.
